-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

Claims 1-11 are pending. No drawings were filed. Foreign priority documents have been received.

***Information Disclosure Statement***

The examiner has considered the IDS.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turner (J. Med. Chem. cited in specification) and Ehrfeld.

Turner teaches process for preparing compounds of formula I. See page 3468 scheme 1 and page 3468 column 1 first full paragraph under 'chemistry'. The sole difference is the use of a microreactor. Ehrfeld et al teach interdigital microreactors used in chemical process. See page 1076 column 1 lines 4-12. The microreactor parameters are within the purview of the skilled artisan.

Art Unit: 1625

Motivation for one of ordinary skill in the art to arrive at the claimed invention arises as the process per se is old and the use of interdigital microreactors in chemical process is well known from Erhfeld. It would be well within the purview of the skilled artisan to perform the instantly claimed process in an interdigital microreactor. Ehrfeld et al makes clear that the artisan can adjust the microreactor to the needs of their process. No unobvious or unexpected results are noted.
